

The fourth annual meeting of *Qualitative Psychology* in 2003 was organized by the Center for Qualitative Psychology (Tübingen, Germany).

The conference focused on questions of *Research Design*.

The main work was done in small working groups.

Plenum lectures were also held, in which selected experts presented their thoughts on the central topic — research design.

All contributions were based on participants' thoughts and arguments about the decisions they made in regard to the designs of their studies.

Content

Introduction and Overview

Leo Gürtler and Silke-Birgitta Gableitner

Design in Qualitative Psychology

Mechthild Kiegelmann and Günter L. Huber

Designing the Move from Data to a Theory of Feeling

(1) The Qualitative-Heuristic Approach to Theory
Gerhard Kleining

(2) Some Questions and Answers about the Qualitative-Heuristic Approach to Theory
Leo Gürtler and Gerhard Kleining

(3) Towards a Dialectic Theory of Feeling
Thomas Burkart

(4) Questioning Burkart's Theory of Feeling
Harald Witt

(5) Some Conclusions
Thomas Burkart

The Application of a Grounded Theory-Based Research Design for Analyzing Caregiver Burden. How to Increase the Specificity of Concepts
Jeannette Bischkopf, Anna Auckenthaler, and Christian Stiglmayr
